HANCOTT

WE ARE STRONG BECAUSE ;

PRODUCTION

As our production process is vertically integrated and highly flexible, we can produce high quality garments in short time periods. We have inhouse production as cutting sewing and packaging and controlling by our QA team with inline and final inspections .

FABRICS

In our group we have our own fabric companies that makes stocks from domestic and export fabrics giving us price advantage and flexibility. We have our fabric sourcing team attending to exhibitors with our design team to follow the trend .

WASHING

We have the biggest laundry in Hanoi in our group (Cotton Denim) ...Our laundry experienced in all kind of new denim washing technics and garment dying . Laundry also Works in sustainable production process as waterless products or less chemical Technologies. Our laundry also Works with biggest denim brands as following the latest trends .

SAMPLING ROOM

we can get quick and succesfull support to create new models with different sewing techniques from our sampling room to give our customers quick and best results. Our leadtimes for proto ,fit or buying samples changes between 3-7 days . salesamples leadtimes are around 2-4 weeks depends on fabric and accessory situation .

DESIGN dept

Our design department room works hard to create new models new designs with combining these supports to give best and latest trends to our customers. We also get a design support and inputs from UK office every season. we have wash development team working with our laundry to catch customers needs acc to trend inputs

Quality and Delivery Control : AQL 2.5 in-line and final garment audits are conducted for all shipments. The results are sent to the related customer upon requests. The procedure and the reporting methode is organised by ITS audits.

HANCOTT DENIM

- ▣ Our own 30 year experienced laundry (denim wash and garment dying) **in Vietnam Cotton Denim** organization giving us fully support with big development laboratory for new trends, new washing techniques while washing 30.000 pcs/day to another brands such as Jack&Jones, Scoth&Soda, Diesel, Levi's, Zara, Mango,Topshop, River Island, Mack ,Tommy Hilfiger etc

OUR MAIN CONCEPTS

REVOLUTION

What is Emana® Technology?

Emana® is a polyamide-based smart yarn with a far infrared technology that transforms the human body heat in benefits to skin care. Thanks to the bioactive crystals embedded in the yarn, Emana® absorbs the human body heat and "emanates" far infrared rays back to the skin promoting biostimulation.

The result is a unique formula which improves skin elasticity and reduces the appearance of cellulite, delivering a

smooth and young
skin with comfort and well-being

Reduction of cellulite appearance and orange peel

Boosting skin elasticity

Increase of skin smoothness and firmness

Highly comfortable

More younger skin, with comfort and wellbeing

Enhancement of skin microcirculation and skin thermoregulation.

An innovative jeans, highly functional, combining fashion, comfort and biotek
